NAMS
THE NORTH AMERICAN MENOPAUSE SOCIETY

Menopause Health Questionnaire

Menopause is a normal event in a woman's life and is marked by the end of menstrual periods. Usually during the 40s, a gradual process leading to menopause begins. This is called the menopause transition or perimenopause. Changes in the pattern of menstrual periods are very common during this stage. Sometimes a woman can have other symptoms too, and these symptoms may extend beyond menopause. Even if a woman has no symptoms, it's important for her to understand the effects of menopause on her health.

This questionnaire is intended to help you inform your healthcare provider about your menopause experience and your general health. Working together, you can develop a plan to support your health, not only now but also in years to come. If you feel uncomfortable answering any of the questions on this form, you may wait and discuss them with your healthcare provider.
