

External labs that may provide travel-related COVID-19 testing

Given the constraints on testing supplies and the need to prioritize for the most essential and high risk situations, we regret that Atrius Health does not offer travel-related COVID-19 testing at this time. To assist patients looking for this type of travel-related testing, our COVID Resource Center team has created a list of outside testing sites below that may be able to accommodate this type of need.

Important information to know:

1. Some insurance companies do not cover COVID-19 testing for asymptomatic reasons such as travel, daycare, school or camp. Please check with your insurance company prior to being tested and research the testing facility to see if there is a co-pay or other payment terms.
2. Atrius Health will not provide an order for COVID19 testing for asymptomatic reasons such as travel, daycare, school or camp.
3. The information below was obtained from public websites and databases and includes test result turnaround times published on those sites as of early August. This information may change over time. We encourage you to contact the facility directly to confirm their ongoing ability to test for COVID19 for travel reasons and their turnaround times for results as those may also change depending on patient demand and availability of testing kits.
4. Some external labs require that you call ahead and schedule an appointment and some accept walk-ins so review their websites closely for guidance.

General Resources				
Name	Website	Sample Type	Results (time after receipt by lab) ¹	More Information
Massachusetts Department of Public Health	https://www.mass.gov/doc/ma-covid-19-testing-sites/download			Listing of all testing locations in MA
